

Determining your ring size

Start by printing this page.

Make sure it's printed actual size by setting Page Scaling to NONE in your print dialog box.

Make sure it's correct by checking one of the bars on the right against a ruler. It must be exactly 2 inches or 50 mm long.

Next, get hold of a ring you know currently fits the relevant finger. Slide it along the spiral of circles until you find the one that fits right against the inside edge of the ring. If the ring falls between two sizes, go for the larger one.

Things to bear in mind that could affect the size you arrive at.

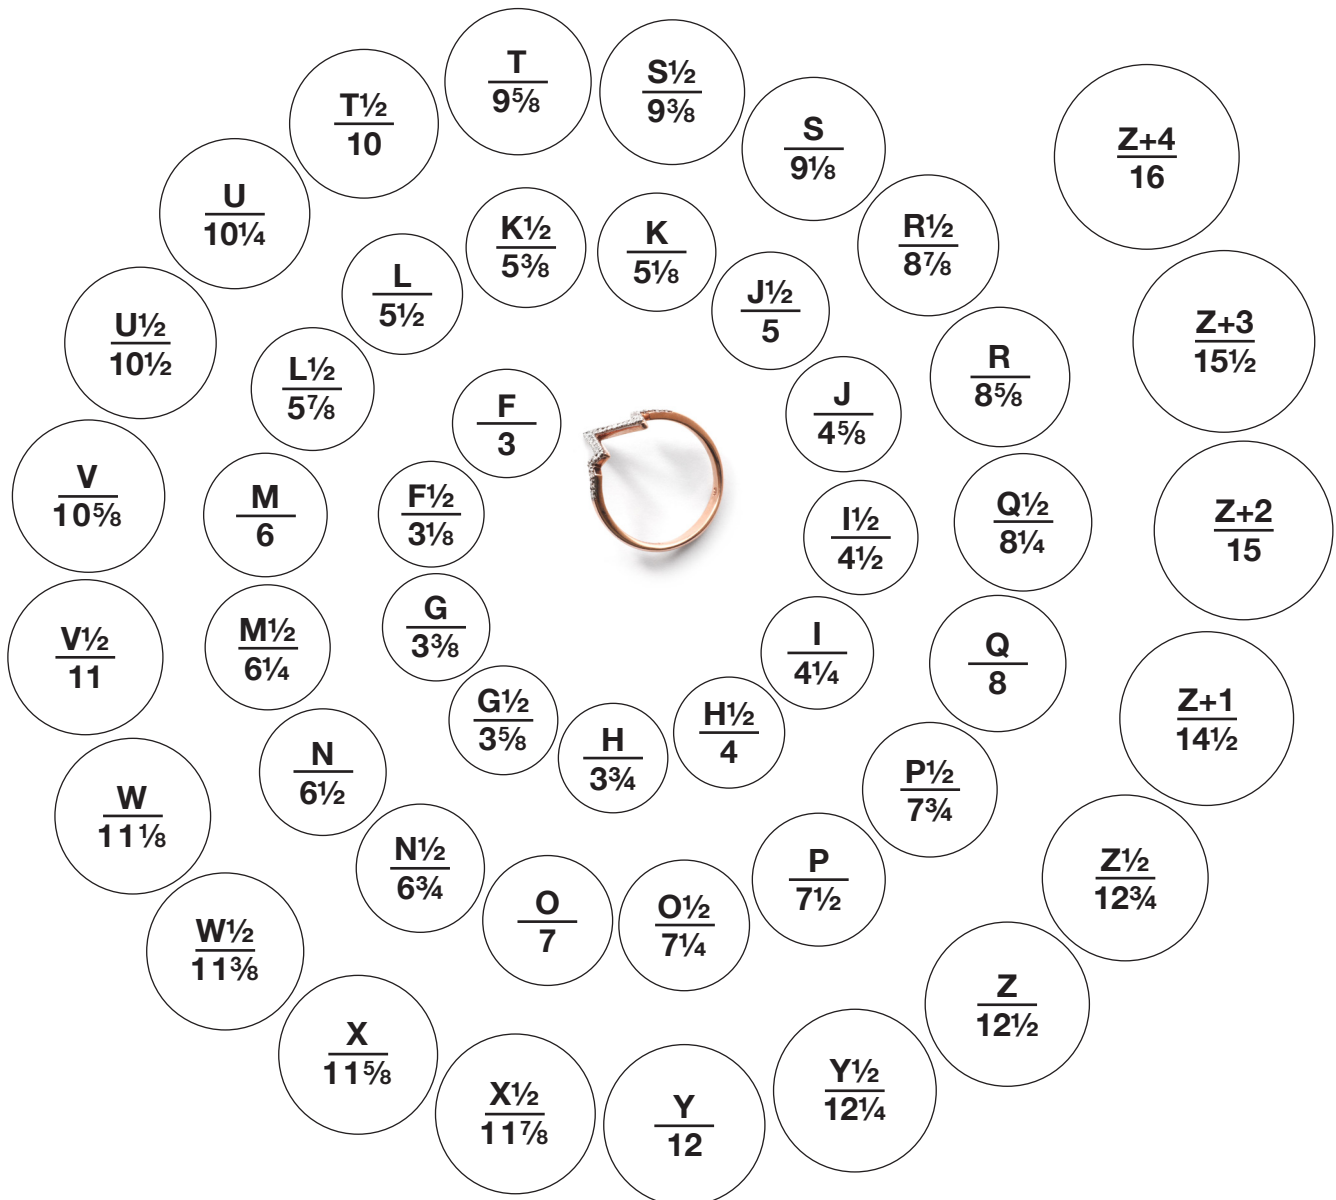

First and most obvious - be sure to measure the finger intended for the ring!

Heat tends to swell your fingers a bit and cold does the opposite. So on a hot day you might arrive at a different size to a cold day.

For the most accurate result, warm hands are the best.

Also, measure more than once just to be sure.

Consuming alcohol also tends to swell your fingers a bit.
